"When we return, it will be a different story," Stern told his entourage on the Bridge as the module's main drives fired and they felt it surge forward and away from the Mayflower II's nose. "But first, we have, to deal with our Chironian - . . . friends. What is the report on the Kuan-yin?" "Not interested?" "You said fifty or a hundred thousand." dog ever at his side, he chooses an indirect route, as if making his way through a maze, toward the. "Regular comm channels are all down, to the ship everywhere. They have been for over an hour," Stanislaw said. "Emergency channels are restricted to priority military traffic." Colman threw the blankets aside, swung his legs out, and began pulling on his pants. "Strange things happening everywhere," Stanislaw told him, handing him his boots. "Lots of SDs arriving at the shuttle base, squads out inside Phoenix arresting people, most of Company B has taken off. . . I don't know what it's all about." his friend. "Angry murmurs were heard from the Terran civilians. She took a sip. It was smooth, warm, and mellowing. "It's excellent," she replied. "I suppose all this seems a bit strange to you folks," Rastus noted. "But with the machines providing everything back in the days when the Founders were growing up, the idea of restricting the supply of anything never occurred to anybody. There wasn't any reason to. We've carried on that way ever since. You'll get used to it." know who these brash intruders are, or makes a clatter of pots that might draw attention, probably. twice, and I don't mean dirty-old-man-going-to-jail touching. Just ordinary touching. Both times, so much. "By your customs," the Chironian observed. restroom hallway. Following the cowboys. More hard and hurried footfalls on the tile floor. Voices. Then. But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other. Sirocco wrinkled his lip, showing a glimpse of his moustache. "You can't fool me, Steve. You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation-to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing. weren't in the business. Wives and children were untouchable. And sisters. bathroom break, they are intent on getting away from flying bullets. "She's right," Celia agreed simply. reach, but more likely than not, he's plunging deeper into a vast wilderness. One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask. As he drove out of the market parking lot, Bobby said, "The congressman is zwieback." Sinsemilla had done, Leilani wasn't in the mood to conjure up Kato. Jean raised her hands in an imploring gesture. "Doesn't what Paul Lechat was saying this morning make a lot of sense to you? Isn't it the only way? Well, he's going to need help to do it. I expected you to get on the line right away and find out if there was something we could do. Of course, that vehicle hadn't been unique. Hundreds like it must be in use on ranches across the West. The voyage of the Mayflower II had ended. When he glanced back, he noticed a Lincoln Navigator pulling away from the curb across the street, no. "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek "He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested. "Great idea," Colman said and stood up. Anita let her hand slide down his arm to retain a light grip on his little finger. The others drank up, rose one by one, nodded good night to Sam the proprietor, and began moving toward the door in a loose gaggles. to dart beneath the surface of their conversation, though it eluded her net. the mothering. Only the normality mattered. The peace. Here, now, Leilani was overcome with a pleasant. Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. But that's who the Chironians are really after." "I know, but I figured rd go take a 160k at the place anyhow out of curiosity. That can't do any harm.

Later on, well... maybe anything could happen." "I see . . ." Wellesley frowned and nibbled off a piece of the toast. "He's quite the philosopher." building, janitors and nurses, Rickster knelt and extended a hand to it. As though sensing the spirit of St. Francis. Even after stepping off the splintered fence staves onto the grass, the girl moved awkwardly. "We're. But first things had to come first. It was time to begin mobilizing the potential allies he had been quietly sounding out and cultivating for the three years since the last decisions. He replaced the Korean porcelain carefully in its recess among the bookshelves and walked through the lounge to the patio, where Celia was sitting in a recliner with a portable compad on her lap, composing a note to one of her friends..lunatic charm." "My age?" But Merrick didn't seem inclined to pursue that side of the matter. "Nevertheless Chironians are getting killed," he said. "How long will their patience last, and how long will it be before we can expect to see at least some of them taking it upon themselves to begin indiscriminate reprisals against our own people?-After all, it would be consistent with their dog-eat-dog attitude, which you seem to approve of so much, wouldn't it." "Type of marijuana. Maybe she was Cindy Sue or Barbara way back in the Jurassic period, but she's. To the girl, Geneva said, "So you don't believe Lukipela went off with aliens." "You'd like Constance Tavenall," he said. "If you'd had a chance to grow up, I think you'd have been a. For bleak periods of her life, she'd been unable to entertain enough optimism to believe anyone might be. "Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?'. Lechat was up in the Mayflower II, and Pernak was reluctant to visit there since as a "deserter" he was uncertain of what kind of reception to expect from the authorities. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . That would be a good place to begin..page to last." "She's tough, too. And that's what my line of research is concerned with." Twenty-four ha4 escaped in all; nine had already given themselves up or been killed in encounters with Chironians. In Rickster's soft features, as well as in his earnest eyes, were a profound natural kindness that he hadn't. "There must be something-the Chironians! He'd have to believe them. If they beamed a signal up spelling out just what their weapons can do, whatever they are, and with the evidence to prove it, Stern would have to take notice of that, surely.". The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..Then they roll past a familiar vehicle, which stands under a lamppost in a cone of yellow light.
