Assuming I did get a low score last time, which isn't certain since the.He silences me with an imperious gesture. "Who do these Sreen think they ore?".Crawford nodded. He looked around at the other occupants of the room. There was the Surface Mission Commander, Mary Lang, the black woman he had seen inside the dome just before the blowout She was sitting on the edge of Lou Prager's cot, her head cradled in her hands. In a way, she was a more shocking sight than Lou. No one who knew her would have thought she could be brought to this limp state of apathy. She had not moved for the last hour.."A Toyota."."How long have you had them?".What brought another of those incredible smiles was the interior. Not only did the carpeting continue up the walls, but as she walked from the kitchen, across the lounge area to the fireplace, and turned to look up at the sleeping loft, each place her feet touched a patch changed color to a pale, clear yellow. She stared, then laughed and ran her hands along the back of a chair. It, too, changed color, to a pattern of pastel greens and yellows..high peaks, where the great serpents dwell. Which was a tremendous accomplishment but also rather frustrating in a way, since it meant he'd come that close to not having to bother scouting out two more endorsements. I was still there when Ike got off picket duty and dropped by. I told him about the package and he agreed it was a nice one. By that time the drinks were coming pretty fast, and an argument had broken out down the bar between one of the bricklayers and one of the brickmakers about the free foot clinic. The bricklayer said that if they were going to furnish a free foot clinic, they should furnish a free hand clinic too, because a bricklayer was as liable to develop arthritis in his hands as a brickmaker was in his feet and in addition was performing a much more essential task. The brickmaker asked him how he'd perform it without the bricks the brickmakers made and said he'd like to see him slog around in mud and straw eight hours a day and see how his feet felt come quitting time. The bricklayer said that where he came from the women did the slogging, and the brickmaker said that that was just the kind of a place a labor-faker like him would come from. But she didn't care to talk about it, unless you agreed with her."..Here comes the second reason, then. There's an evolutionary advantage to sexual reproduction that more than makes up for all the inconveniences.\* In cloning, the genetic contents of new organisms remain identical with those of the original organisms, except for occasional mutations. If the organism is very efficiently adapted to its surroundings, this is useful, but it is an extremely conservative mechanism that reduces the chance of change. Any alteration in the environment could quickly lead to the extinction of a species..his hair was grey. His voice sounded to Amos like wind over mouse fur, or sand ground into old velvet."But why this thing?" Crawford asked, pointing to the impossible artifact-plant. Which is a pilot. Might that be."This is what would kill us, Crawford. What's your first name? Matt. Matt, this baby is a flyer for the."Commander Lang?"..A new exploration of the whirligig garden the next day revealed several new species, including one more thing that might be an animal. It was a flying creature, the size of a fruit fly, that managed to glide from plant to plant when the wind was down by means of a freely rotating set of blades, like an autogiro..Something had caused Mary Lang's eyes to look up. It was a reflex by now, a survival reflex..ground. Only her eyes remained the same.."Thank you, Matt." Congreve's voice rumbled in a gravelly baritone from the speakers all around. He glanced from side to side to take in the whole of his audience. "I, ah-I almost didn't make it here at all." He paused, and the last whispers of conversation died away. "A sign in the hall outside says that the fossil display is in twelve-oh-three upstairs." The American Archeological Society was holding its annual convention in the Hilton complex that week. Congreve shrugged "I figured that had to be where I was supposed to go. Luckily I bumped into Matt on the way, and he got me back on the right track." A ripple of laughter wavered in the darkness, punctuated by a few shouts of protest from some of the tables. He waited for silence, then continued in a less flippant voice. "The first thing I have to do is thank everybody here, and all the NASDO people who couldn't be with us tonight, for inviting me. Also, of course, I have to express my sincere appreciation for this, and even more my appreciation for the sentiments that it signifies. Thank you--all of you." As he spoke, he gestured toward the eighteen-inch-long, silver and bronze replica of the as yet unnamed, untried SP3 star probe that stood on its teak base before Congreve's place at the main table.
