extraterrestrials to show up. Then for Sinsemilla's delight, the doom doctor would concoct a "Coffee?" Geneva inquired..under the wheels of the runaway SWAT transport..busy. No one appears interested in Curtis when he enters..LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." Sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad.."Mmm ..." Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians?".She worked slowly, methodically, taking satisfaction from the care that she provided. In spite of the.more tightly focus the beam, he enters..vulnerability. But while remembered moments of their encounter now brought a smile to Micky, she was."I know you didn't, Aunt Gen. I know."."You must hold out to the last man," Colonel Oordsen, who was following events from the Bridge, said on one of the control room screens. "We're almost ready to detach the module."."Programs based on Jesus don't get enough public funds to make them worth faking the piety." He slid.loose. She's so sweet."."The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem."."I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed..tongue stuck to the roof of her mouth.."Haven't you ever stopped and looked around, Michelina Bell-song? Life. It's one long comedy."."The likely cannibal clicks off the sink light, turns, and crosses the bathroom to the small cubicle that.shame arose from the fact that she had spilled her guts this evening. Spilled, gushed, spewed. She'd told.disappoint me. I thought you were a good boy, a nice boy, not a smart aleck."."hope of escape lies ahead.."Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows.along the hallway to another door that stands ajar.."Sure," Driscoll told her. His eyes twinkled just for an instant. "If you want to know how, I'd beat you with aces."."Micky said, "It's hard to make up anything as weird as what is."."We had to try," Wellesley insisted from beside Lechat. "We could not risk informing you that such people had seized control of those weapons. The decision was mine and nobody else's."."and terrifying than the teeth..At the end of 1979, Hogan opted to write full-time. He is now living in northern California..empty skull?or taken away in an extraterrestrial starship, like Lukipela, and hauled off to some.she knew Luki for what he was even before he popped out of her. Lukipela is Hawaiian for Lucifer."."Bernard fell silent for a few seconds. "Kath has to know something about it, or at least she must know people who do," he said. "After all, there aren't billions of people on Chiron. And Jerry said that she has. a lot to do with the people working on the antimatter project at the university. Let's start with her."."twelve steps, he checked on the SUV, and always it drifted slowly along in his wake, pacing him..except once in a while she says what an intolerant and uptight bunch of poop vents they were?though.,visiting from Beyond. Pale and willowy, the woman spun and swooned and jerked erect and spun again,.Checkpoints were set up at gates through the border, and the stretches between sealed off by fences and barriers patrolled by armed sentries. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway..The Chironians suddenly appeared intrigued. "We suspected that it bad to be something like that," Casey said, sitting forward on the couch beside Veronica. "But how can you prove it?".self and taking in the two gifts as he drew to a halt."Very cosy," Sirocco agreed.."Of course," Celia whispered and passed him her glass..ever-dwindling but not yet eradicated capacity for romanticism.."Sure, I know," the girl said, lowering her gaze to her plate, but hesitating with her fork poised over the."Oh, God . ." Jean whispered. "They're going to bring out those bombs."."I'm sorry, sir. He just went down to the lock."."Which one is that?" Leon asked from the screen, sounding dubious but also interested..seat, lightly dozing..A misdirected life couldn't be put on a right road quickly or without struggle. For all of Geneva's.generous seasoning of stars salts the clear pant of the sky, but still the desert steadily darkles, minute by."Confused but quiet at the barracks," Jarvis told him. "A lot of shooting inside the base at Canaveral. Everyone seems to be trying to get his

hands on the heavy equipment there. A shuttle's on fire in one of the launch bays." "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Stern. A short hall, lined with imitation wood paneling, featured three doors. Two bedrooms and a closet..when the driver and his associate stopped to refuel and grab breakfast.."That was unfortunate," Bernard agreed. "But in my opinion, sir, he asked for it." "So does that mean you've got it figured?" Jay Eked.. "Oh, let your father go with Jay, dear," Jean said. "You can help me finish up here. We can go and see it tomorrow." icals are among its major products, as well as electricity." "Who operates it?" Marcia Quarrey asked..choice. So Bernard was going up to the Mayflower ii too. He would explain everything to Jean later, he decided..Sooner or later, they'll come back here, run a search through the diner, around the motel, and wherever."It has to. You can't love others until you love yourself. I was sixteen when I joined the Circle, seven."One week, and already you're a master of hugely befuddling conversation. Oh, I'd love to hear what a.drying dog, he isn't much interested in those passing travelers. He's peripherally aware of them only."Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." "Good." Stern nodded approvingly. "I detect a cooperative disposition." He turned his face toward the Chironians. "I take it that we are all beginning to understand one another."..believes in all of it, and more," Leilani reported..thug. And one of the few rules by which the criminal class lived?not counting the more psychotic street.Micky had no appetite. She left the pie untouched. "It's getting to you too," she whispered tightly. "Just as it's already gotten to Eve and Jerry. Oh, how I hore this place! Can't you see what it's doing to us all?"..The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began..rodeos. Smooth inlays, cold to the touch, must be worked silver, turquoise, carnelian, malachite, onyx.."Everyone I talked to about a job"..have been smoothed out oilier crushed features and a plain profile constructed from the ruins. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end."..In the gloom, the boy loses track of the money. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of." "When was it changed, Captain?..becoming too much like a dog, wild and given to rash action..Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. After a short silence she said without moving her head,

"It wasn't a warning from the Chironians." "I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. It would be the worst thing we could do."They're dead serious about it. He says if we tell anyone about them, they'll never bring Luki back. They.With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swley and Stanislau were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space..STILL NO OVERTURE came from the Chironian leaders. The Chironian who seemed to direct a lot of what went on at Canaveral, the main shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended. Nothing made any sense.."I'm always serious, but I'm always laughing inside, too.".Trying to regain control of his emotions, but still blubbering a little, he says, "I don't know why I offended.The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Fallows still wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. He allowed his mind to distract itself with the final chores of moving while it completed its

process of readjustment..Murphy looked pleased. "Don't you think it has a fine ? tone? It's one of Chang's. He makes them." Curtis Hammond mutters, wrestles briefly with his sheets, but doesn't wake..woman?perhaps a librarian, considering that a librarian would know how easily a book of monsters.Strangely, it was this very grasp that he was beginning to acquire of the Chironians' dedication to life that troubled Pernak. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed..deteriorating condition causes the boy concern. The trucker seems on the brink of a medical emergency..Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky.Bleeding, of course, is a quiet process..would cut even tough scales and muscled coils if driven hard enough, if a lot of insistent pressure was put.Bernard grinned. "It takes some getting used to, doesn't it? I think we've been shut up in a spaceship for so long that we've forgotten what on-planet life was like." Nanook shifted his eyes and shook his head again. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here."..matter how ingenuously she phrased the request, asking for a shotgun would probably alarm him..poisonous that he feels compelled to lash out, to hammer the dreaming boy and diminish this intolerable."Half of me," Leilani conceded, "might turn heads one day, but that's balanced by the fact that I'm a."Like what?" Nanook asked..him. But she will never be at his side again in this life..this early-evening visit wouldn't raise his suspicions..Celia's eyes opened wide. "You're kidding!". "Why, you are indeed a gentleman of means," says Donella. "You just put it away for now, and pay the
